

**We deliver the full cycle – from waste to net-zero**

## We're an end-to-end biomethane provider

At CycleØ, we believe it's critical to develop achievable and rapid solutions to humankind's environmental impact. We focus on capturing methane from the agri-food sector and turning it into biomethane for vehicles and grid injection.

## Our mission

Methane is a potent greenhouse gas that has 80 times the global warming power of CO<sub>2</sub>. We're on a mission to slow the pace of global warming now by deploying innovative, readily available solutions to today's worldwide environmental challenges.

## Our vision

We aspire to deliver the global shift to scalable and sustainable energy for all.

## Environmental and social benefits

Sustainability lies at the core of our DNA. We bring an end-to-end approach to biomethane production, empowering agri-food producers to join the circular economy, creating local jobs by developing small-scale decentralised facilities, and decarbonising the gas grid and transport sector. Our goals for 2024 are:

## Careers at CycleØ

We're looking for purpose-driven people to help us on our mission to slow climate change and deliver immediate solutions for today's global environmental challenges.

We're hiring for various roles, from experienced executives and people with direct energy or agriculture expertise to recent graduates.

If you want to help us reduce GHGs and join a team of like-minded people, then come and be part of our journey from waste to net-zero!
